shaikhaftab7861234@gmail.com

Frontend-focused Full Stack Developer specializing in scalable web and mobile applications using React.js, React Native, and modern JavaScript. Experienced in building data-intensive dashboards, optimizing performance, and designing maintainable UI architectures. Strong in API integration, complex state management, and high-performance frontend systems.

SKILLS

- React.js (Advanced)
- React Performance Optimization
- React Native
- JavaScript (ES6+)
- TypeScript (Working Knowledge)
- HTML5 & CSS3
- Tailwind CSS
- TanStack Query
- Context API / Global State Management
- AG Grid / Complex Data Handling
- Node.js (Basic REST APIs, Express)
- MongoDB (Basic CRUD & Integration)

PROFESSIONAL EXPERIENCE

Freelancer – Frontend Developer

Myself, Mumbai

Nov 2023 - Present

- Designed and developed responsive web applications using React.js, JavaScript, HTML, and CSS, ensuring cross-browser compatibility and mobile-first performance.
- Built and optimized landing pages with clean UI, improving load speed, responsiveness, and user engagement.
- Translated client requirements into scalable frontend solutions, handling UI architecture, API integration, and performance optimization.
- Collaborated directly with clients to debug issues, improve UX, and deliver production-ready features on tight timelines.
- Managed multiple freelance projects independently, handling planning, development, testing, and deployment.

Frontend-Focused Full Stack Developer

Arysoft Global Services Private Limited, Mumbai

Sep 2024 - Present

- Modernized legacy frontend architecture using React.js and modern JavaScript, improving performance, maintainability, and user experience.
- Designed and developed scalable, data-driven UI systems with optimized rendering and efficient state management.
- Built a complex dashboard for application and revenue management, featuring advanced filtering, dynamic data handling, and performance optimization.
- Enhanced school and inventory management systems by improving UI workflows, data visualization, and frontend responsiveness.
- Optimized application performance by reducing unnecessary re-renders and improving API data handling.
- Collaborated in feature releases, debugging production issues, and delivering stable, production-ready updates.

EDUCATION

Bachelor of Computer Applications (BCA) – Computer Science

Tilak Maharashtra Vidyapeeth, Pune, India

Graduated: July 2025

PROJECTS

Experienced in building scalable and high-performance web and mobile applications using **React.js, React Native, and modern JavaScript**. Proven track record in developing data-intensive dashboards, real-time systems, and complex UI architectures with optimized rendering and maintainable code. Skilled in API integration, advanced state management, and frontend performance optimization for production-scale applications.

Key Projects & Contribution:

XJOINS — Enterprise ETL & Data Integration Platform (*Main Frontend Lead*)

Role: Main Frontend Lead

- Led frontend architecture using **React.js, TanStack Query, AG Grid, Handsontable, and React Flow** to build a complex data-driven ETL interface.
- Built high-performance **data-heavy dashboards, pivot tables, and spreadsheet-style data viewers**, enabling advanced data manipulation and visualization.
- Developed custom **Excel/flat-file viewer and dynamic data transformation UI** for large dataset handling.
- Designed scalable component architecture for **node-based workflow canvas using React Flow**, supporting complex data pipelines.
- Implemented optimized rendering, async data handling, and performance tuning for large-scale datasets.
- Collaborated with backend and data teams to build a production-grade data processing platform.

(Product under development)

Aryventory — Inventory Management System (*Operations Module*)

Role: Frontend Developer (Operations Module)

- Developed and enhanced the **Operations Module** for inventory workflow management and operational tracking.
- Built dynamic UI for stock movement, operational data handling, and real-time inventory updates.
- Optimized frontend rendering and improved user workflow efficiency across operational dashboards.
- Integrated APIs and improved data visualization for better tracking and decision-making.

School Management System — React Native App

Role: Frontend React Native Developer (Team)

- Developed student & staff management features including **attendance tracking and academic workflow UI**.
- Contributed to timetable scheduling system and real-time parent/student portal for grades and assignments.
- Implemented map integration and **bus tracking UI with real-time data updates**.
- Improved UI performance and responsiveness across mobile devices.

(Product under development)

Inventory Management System — React Native + Backend App

Role: React Native & Backend Developer

- Built UI components and improved UX for real-time inventory tracking system.
- Contributed to backend APIs using **Express.js & PostgreSQL**.
- Implemented barcode scanning for fast product entry and retrieval.
- Developed purchase, sales, and supplier management workflows.
- Helped implement **role-based access control (RBAC)** for secure system usage.
- Contributed to analytics & reporting dashboards for stock and revenue insights.
